To enable seamless testing, we have exposed a test only endpoint which can be used to get the OTP or EVC without the dependency of phone/email configuration.

This is a **test only** utility API available only in UAT.

Please find below the sample request and the response to call the OTP APIs, this is will help in getting the OTP code for validation. Highlighted needs to be replaced with respective PAN and transaction number

Endpoint: https://uatservices.incometax.gov.in/iec-uat/uat/eriapi/getOtpCode

- Please pass Client ID, Secret and Access Mode as usual for authorization.
- No requirement to pass Auth token or Sign this data (send the raw data as is)

| | Sample Request | Sample Response |
|---|---|---|
| Add Client | ```json<br>{<br>    "serviceName": "getOTPCode",<br>    "userId": "ABCPV9999E",<br>    "transactionId": "FOS000000212644",<br>    "tableFlag": "O"<br>}<br>``` | ```json<br>{<br>    "messages": [<br>        {<br>            "code": "EF00000",<br>            "type": "INFO",<br>            "desc": "OK",<br>            "fieldName": null<br>        }<br>    ],<br>    "otp": "123409",<br>    "errors": null<br>}<br>``` |
| Register Client (Make call individually for each for SMS/email | ```json<br>{<br>    "serviceName": "getOTPCode",<br>    "userId": "XYZPU9999F",<br>    "transactionId": "FOS000000212697",<br>    "tableFlag": "O"<br>}<br>``` | ```json<br>{<br>    "messages": [<br>        {<br>            "code": "EF00000",<br>            "type": "INFO",<br>            "desc": "OK",<br>            "fieldName": null<br>        }<br>    ],<br>    "otp": "555555",<br>    "errors": null<br>}<br>``` |
| Prefill | ```json<br>{<br>    "serviceName": "getOTPCode",<br>``` | ```json<br>{<br>    "messages": [<br>``` |

```
        "userId": "XYZPU9999F",
        "transactionId": "FOS000000212761",
        "tableFlag": "O"
}
```

```
            {
                "code": "EF00000",
                "type": "INFO",
                "desc": "OK",
                "fieldName": null
            }
        ],
        "otp": "121212",
        "errors": null
}
```

| Bank EVC / Demat EVC | | |
|---|---|---|

```
{
"serviceName" : "getOTPCode",
    "userId": "AJOPJ5808D_EVC",
    "transactionId": "",
    "tableFlag": "E"
}
```

```
{
    "messages": [
        {
            "code": "EF00000",
            "type": "INFO",
            "desc": "OK",
            "fieldName": null
        }
    ],
    "otp": "2BBBBBBBBW",
    "errors": null
}
```
